

How energy intensive is your school district?

Compare with others in the Lower Mainland & Vancouver Island

4TH ANNUAL PUMA **BENCHMARKING SUMMARY**

For BC School Districts: 2016 Calendar Year

saving you energy

Scope

The sites included in the benchmarks are from the following BC School Districts that subscribe to monthly PUMA utility monitoring software & services:

About PUMA

PUMA comprises a combination of software and services from Prism Engineering that track over 15,000 electrical, natural gas, water, and other fuel accounts for government, commercial, and institutional customers. Since launching online in 2009, more and more organizations have enlisted PUMA to help track and analyze building energy use.

PUMA is currently used by over 20 Energy Managers, and more than 40 organizations across Canada. Our utility tracking software and services save time and money for owners of multiple properties.

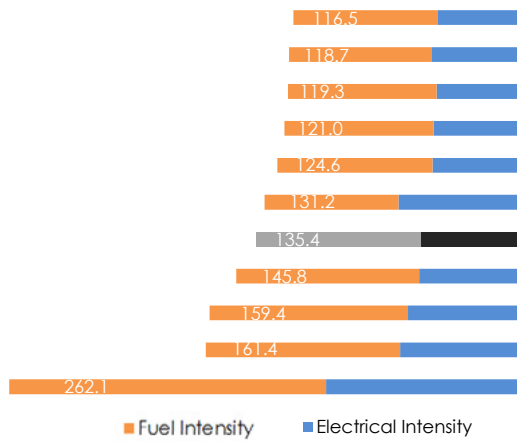

About this Report

Each year the PUMA team at Prism Engineering puts together a benchmarking report for school districts, advanced education and municipalities. Based on compiled data from PUMA, this report enables the comparison of similar sites across each sector.

How energy intensive is your school district?

Energy Intensity (ekWh/m²) for 10 BC SD
Calendar Year 2016

Emissions Intensity (kgCO₂e/m²) for 10 BC SD
Calendar Year 2016

These districts are all in a common climactic zone so adjustments for weather are not needed. Energy Use Intensity (EUI) allows sites of different sizes to be compared.

BC Board Offices EUJ Calendar Year 2016

Summary

School District Building Type	Median Energy Use per m ² (EUI)	Number of buildings in sample
Elementary	124 ekWh/m²	n=230
Secondary	126 ekWh/m²	n=49
Board Offices	175 ekWh/m²	n=10

PUMA is an affordable and effective way to compare the performance of all the buildings in your portfolio, including the ability to normalize for weather.
